*Checks or Parcels  
Please Mail / Forward  
to our office: In process of moving  
please contact us for New address.*

All provided Pricing & Quotations are subject to final review of artwork and specifications when received by our team. We reserves the right to re-quote (or refuse) an order before acceptance and processing if a discrepancy is identified.

Please make sure to check the design, layout and specification of your product before you make your final purchase. Since a custom-configured product is built to your specifications, once your purchase is confirmed, the order cannot be changed, modified, or cancelled.

## Art Requirements

Please send attached to your email any graphic files:  
bitmap files in real size / 300 dpi resolution  
(.jpg , .gif , .tif , .pcx, .png) or send vector format files:  
.cdr, .ai, .eps , .pdf, .dxf or .wmf file.

Names send in the body of email or as .txt files (.xls or .doc)  
With Our Full color Process white in the Logo is replaced with background metal color.

With our CMYK Laser-Imprint process we can not guarantee PMS match but we can come within a shade to requested color.

Some pastel and Gray light colors can not be printed on metal with our process - see more details about our process below.

## About Laser-Imprint™ Printing Process

Laser Imprint Digital process is Transfer process with improved colors appearance and prolonged UV durability of product thanks to the special coating.

Laser-Imprint process allow us to print custom color Logo with high accuracy and color's exposure on GOLD or SILVER background.

As CMYK based process we are able to print all color combinations of CMYK. White in the Logo is always replaced with metal background.

Colors printed with our process are very strong and close to the real colors

but PMS match is impossible as print on metal is not same as print on the paper!

Colors are slightly translucent allowing metal reflective surface to be nicely visible.

UV Durability is prolonged due to special UV protective

coating and they can be used outdoor.

However, we are recommending indoor use of Laser-Imprinted signs, plates & badges.

# Metal Labels
